**ABSTRACT**

~~The invention relates to a device and a~~ Device and method to represent and/or display a data index structure in an XML file in a very easy manner with the aid of an internet-capable language, especially XML, in automation apparatus, so-called embedded devices, that as a rule do not have their own file index structure and ~~to~~ bringing said data index structure to the embedded device by sending the file so that the target machine can work as a web server thereby enabling remote access.
